

LOADING DEVICE FOR DECK OVENS

INTELLIGENT HELPER

Asistent

How do you serve several deck ovens at once? The Asistent loading device can facilitate and accelerate the loading of dough and the collection of bread from deck ovens. Deck ovens basically wouldn't exist without a loading device. A wide range of loading equipment is available which we develop and produce ourselves depending on the desired output and the size of the bakery.

ASISTENT MANUAL

The basic Asistent Manual loading device is suitable for small and artisan bakeries. It can load and collect bread from decks only by using counterweight and mechanical lifting and lowering the loading table.

Advantages

- Simple and quick loading
- Half-deck design
- Simple and convenient operation
- Suitable for a one-deck oven
- Control: Basic

ASISTENT SUPER

The Asistent Super loading device features quick and easy oven loading with manual basket tipping. Motion functions from loading to collecting bread are controlled with one button.

Advantages

- Semi-automatic design
- Suitable for 1-2 deck ovens
- Half-deck and whole-deck design
- No vacuum installation
- Control: Basic, Comfort

ASISTENT SUPERAUTOMAT

The most sought-after deck oven accessory. Whole-deck semi-automatic version with the loading of a whole deck at once with very easy operation.

Advantages

- Semi-automatic design
- Also suitable for multi-deck ovens
- Whole-deck design
- Loading of low-weight bakery products from 50 g directly on baking plates
- Option of installing a 7,5 kW vacuum cleaner
- Control: Basic, Comfort

ASISTENT COM

Higher model line of loading equipment suitable for operating semi-automatic or automatic bread lines. Asistent Com is a more powerful device for medium bakeries with 100% reliable operation.

Advantages

- Higher model line
- Operate multiple ovens at once
- Ideal for high baking performance
- Motorized travel x static placement in single oven installation
- Option of installing a 7,5 or 13 kW vacuum cleaner
- Control: Basic, Comfort, MultiControl

ASISTENT LINE

Asistent Line is the premium loading device model line with the highest baking performance and the fastest operation of automatic bread lines with the MultiControl system. Thanks to its robust design, Asistent Line is designed for 24 hours of operation with an output of up to 2,000 kg of bread per hour.

Advantages

- The most powerful loading device
- 24-hour operation
- The highest degree of baking automation
- Height-adjustable up to 15 decks
- Robust design
- Option of installing a 7,5 kW or a 13 kW vacuum cleaner
- Loading of low-weight bakery products from 50 g directly on baking plates
- Control: MultiControl
